Chemical Physics 220 (1997) 413–421

Chemical Physics

Subject index to volume 220

Methods

Theoretical

Many body and quasiparticle approaches

Strong-field approach to ultrafast pump–probe spectra: dye molecules in solution, D.H. Schirrmeister and V. May 220 (1997) 1

Highly correlated QDPT-CI calculations of valence and core photoelectron spectra of Ne, G. Fronzoni and P. Decleva 220 (1997) 15

Coupling schemes and perturbative treatments

Phenomenological model for reaction kinetics coupled to a relaxing environment, Y.A. Berlin, A.L. Burin and S.F. Fischer 220 (1997) 25

Transport quantum mechanics

Diatomics-in-molecules study of the ground and excited states of H_3^-, A.K. Belyaev and A.S. Tiukanov 220 (1997) 43

The magnetic field influence on bridge-assisted electron transfer, E.G. Petrov, I.S. Tolokh, V.V. Gorbach and V. May 220 (1997) 249

Equilibrium statistical mechanics

Structure and dynamics at the surface of a concentrated aqueous solution of CsF, J. Dietter and H. Morgner 220 (1997) 261

Statistical mechanics of stationary states

Statistical mechanical treatment of reactive solvent extraction, M. Lukhezo, L.J. Dunne, B.G. Reuben and M.S. Verrall 220 (1997) 53

Ab initio schemes for stationary properties

Quantum chemical exploration of the HCl dimer interaction, A.W. Meredith, L. Ming and S. Nordholm 220 (1997) 63

Collision-induced electronic transitions in complexes between benzene and molecular oxygen, B.F. Minaev, K.V. Mikkelsen and H. Ågren 220 (1997) 79

Computational and simulation methods

Highly correlated QDPT-CI calculations of valence and core photoelectron spectra of Ne, G. Fronzoni and P. Decleva 220 (1997) 15

Quantum effects in adiabatic electrochemical electron-transfer reactions, M.T.M. Koper, J.-H. Mohr and W. Schmickler 220 (1997) 95
A three-body calculation for collision-induced dissociation, K. Sakai 220 (1997) 115
Two-level system with noise: Blue's function approach, E. Gudowska-Nowak, G. Papp and J. Brickmann 220 (1997) 125
Structure and dynamics at the surface of a concentrated aqueous solution of CsF, J. Dietter and H. Morgner 220 (1997) 261
The tunneling frequencies of the isotopic forms of methane in rare-gas solids, D. Smith 220 (1997) 279
Classification of Cm I energy levels using PCA–BPN and PCA–NLM, X. Cao, H. Liu and N. Chen 220 (1997) 289
Extended Fenske–Hall LCAO MO calculations of core-level shifts in solid P compounds, R. Franke, T. Chassé, J. Reinhold, P. Streubel and R. Szargan 220 (1997) 299

Molecular dynamics and scattering theory

Diatomics-in-molecules study of the ground and excited states of H_3^-, A.K. Belyaev and A.S. Tiukanov 220 (1997) 43
Scattering of large argon clusters from a Pt(111) surface with low collision velocities, M. Svanberg, N. Marković and J.B.C. Pettersson 220 (1997) 137
Structure and dynamics at the surface of a concentrated aqueous solution of CsF, J. Dietter and H. Morgner 220 (1997) 261
Spectroscopic investigation of ground state pyrrole ($^{12}C_4H_5N$): the N–H stretch, A. Mellouki, R. Georges, M. Herman, D.L. Snavely and S. Leytner 220 (1997) 311
Forward and reverse excitation energy transport in concentrated two-component systems, P. Bojarski and L. Kułak 220 (1997) 323
Reaction dynamics of the $Ca(^1D_2, {}^3P_J) + CH_3I \rightarrow CaI^* + CH_3$ system: chemiluminescence, energy disposal and product polarization, J.M. Orea, A. Laplaza, C.A. Rinaldi, G. Tardajos and A. González Ureña 220 (1997) 337

Experimental

Magnetic resonances

A contribution to the theory of OD EPR of spin-correlated radical pairs, K.M. Salikhov, Y. Sakaguchi and H. Hayashi 220 (1997) 355

Cyclotron resonance

Nonradiative processes and infrared emission in matrix isolated ND, N. Caspary, B.E. Wurfel, A.M. Smith and V.E. Bondybey 220 (1997) 241

Infrared spectroscopy

Spectroscopic investigation of ground state pyrrole ($^{12}C_4H_5N$): the N–H stretch, A. Mellouki, R. Georges, M. Herman, D.L. Snavely and S. Leytner 220 (1997) 311

Visible and UV spectroscopy

Collision-induced electronic transitions in complexes between benzene and molecular oxygen, B.F. Minaev, K.V. Mikkelsen and H. Ågren 220 (1997) 79
Spectroscopic properties of chlorophylls and their derivatives. Influence of molecular structure on the electronic state, Y. Nonomura, S. Igarashi, N. Yoshioka and H. Inoue 220 (1997) 155

Line broadening in a polymer glass as investigated by stimulated photon echo spectroscopy: spectral diffusion versus heating effects, S.J. Zilker and D. Haarer 220 (1997) 167
Non-exponential decays of the S_1 vibronic levels of acetaldehyde, S.-H. Lee and I.-C. Chen 220 (1997) 175
VUV optical-absorption and electron-energy-loss spectroscopy of formamide, J.M. Gingell, N.J. Mason, H. Zhao, I.C. Walker and M.R.F. Siggel 220 (1997) 191
The photoabsorption spectrum of vinylchloride (C_2H_3Cl) in the 8–12 eV range, R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 207
Forward and reverse excitation energy transport in concentrated two-component systems, P. Bojarski and L. Kułak 220 (1997) 323
Reaction dynamics of the $Ca(^1D_2, {}^3P_J) + CH_3I \rightarrow CaI^* + CH_3$ system: chemiluminescence, energy disposal and product polarization, J.M. Orea, A. Laplaza, C.A. Rinaldi, G. Tardajos and A. González Ureña 220 (1997) 337
J-aggregation and disaggregation of indocyanine green in water, F. Rotermund, R. Weigand and A. Penzkofer 220 (1997) 385

Fluorescence spectroscopy
Collision-induced electronic transitions in complexes between benzene and molecular oxygen, B.F. Minaev, K.V. Mikkelsen and H. Ågren 220 (1997) 79
Reaction dynamics of the $Ca(^1D_2, {}^3P_J) + CH_3I \rightarrow CaI^* + CH_3$ system: chemiluminescence, energy disposal and product polarization, J.M. Orea, A. Laplaza, C.A. Rinaldi, G. Tardajos and A. González Ureña 220 (1997) 337
A contribution to the theory of OD EPR of spin-correlated radical pairs, K.M. Salikhov, Y. Sakaguchi and H. Hayashi 220 (1997) 355

Photoelectron and Auger spectroscopy
The He(I), threshold photoelectron and constant ion state spectroscopy of vinylchloride (C_2H_3Cl), R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 217
Extended Fenske–Hall LCAO MO calculations of core-level shifts in solid P compounds, R. Franke, T. Chassé, J. Reinhold, P. Streubel and R. Szargan 220 (1997) 299

X-ray spectroscopy
Spectroscopic properties of chlorophylls and their derivatives. Influence of molecular structure on the electronic state, Y. Nonomura, S. Igarashi, N. Yoshioka and H. Inoue 220 (1997) 155

Electron impact spectroscopy
VUV optical-absorption and electron-energy-loss spectroscopy of formamide, J.M. Gingell, N.J. Mason, H. Zhao, I.C. Walker and M.R.F. Siggel 220 (1997) 191

Synchrotron spectroscopies
VUV optical-absorption and electron-energy-loss spectroscopy of formamide, J.M. Gingell, N.J. Mason, H. Zhao, I.C. Walker and M.R.F. Siggel 220 (1997) 191
The photoabsorption spectrum of vinylchloride (C_2H_3Cl) in the 8–12 eV range, R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 207
The He(I), threshold photoelectron and constant ion state spectroscopy of vinylchloride (C_2H_3Cl), R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 217

Coherent optical spectroscopy
Line broadening in a polymer glass as investigated by stimulated photon echo spectroscopy: spectral diffusion versus heating effects, S.J. Zilker and D. Haarer 220 (1997) 167

Optoacoustic spectroscopy
Spectroscopic investigation of ground state pyrrole ($^{12}C_4H_5N$): the N–H stretch, A. Mellouki, R. Georges, M. Herman, D.L. Snavely and S. Leytner 220 (1997) 311

Atomic and molecular beam techniques
Reaction dynamics of the $Ca(^1D_2, {}^3P_J) + CH_3I \rightarrow CaI^* + CH_3$ system: chemiluminescence, energy disposal and product polarization, J.M. Orea, A. Laplaza, C.A. Rinaldi, G. Tardajos and A. González Ureña 220 (1997) 337

Time-resolved experiments
Non-exponential decays of the S_1 vibronic levels of acetaldehyde, S.-H. Lee and I.-C. Chen 220 (1997) 175
Effects of CCl_4 on positronium formation in pure isooctane and in AOT/water/isooctane microemulsions, M.F. Ferreira Marques, H.D. Burrows, M. da Graça Miguel, A.P. de Lima, C. Lopes Gil and G. Duplâtre 220 (1997) 233
Ionization and fragmentation of OCS and CS_2 after photoexcitation around the sulfur 2p edge, U. Ankerhold, B. Esser and F. von Busch 220 (1997) 393

Mass spectrometry
Nonradiative processes and infrared emission in matrix isolated ND, N. Caspary, B.E. Wurfel, A.M. Smith and V.E. Bondybey 220 (1997) 241

Light scattering
Degree of aggregation of indocyanine green in aqueous solutions determined by Mie scattering, R. Weigand, F. Rotermund and A. Penzkofer 220 (1997) 373

Objects

Bulk systems

Gases
VUV optical-absorption and electron-energy-loss spectroscopy of formamide, J.M. Gingell, N.J. Mason, H. Zhao, I.C. Walker and M.R.F. Siggel 220 (1997) 191
The photoabsorption spectrum of vinylchloride (C_2H_3Cl) in the 8–12 eV range, R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 207
The He(I), threshold photoelectron and constant ion state spectroscopy of vinylchloride (C_2H_3Cl), R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 217

Supersonic beams
Non-exponential decays of the S_1 vibronic levels of acetaldehyde, S.-H. Lee and I.-C. Chen 220 (1997) 175
Spectroscopic investigation of ground state pyrrole ($^{12}C_4H_5N$): the N–H stretch, A. Mellouki, R. Georges, M. Herman, D.L. Snavely and S. Leytner 220 (1997) 311

Liquid mixtures and solutions
Statistical mechanical treatment of reactive solvent extraction, M. Lukhezo, L.J. Dunne, B.G. Reuben and M.S. Verrall 220 (1997) 53

Effects of CCl_4 on positronium formation in pure isooctane and in AOT/water/isooctane microemulsions, M.F. Ferreira Marques, H.D. Burrows, M. da Graça Miguel, A.P. de Lima, C. Lopes Gil and G. Duplâtre 220 (1997) 233
Structure and dynamics at the surface of a concentrated aqueous solution of CsF, J. Dietter and H. Morgner 220 (1997) 261
Forward and reverse excitation energy transport in concentrated two-component systems, P. Bojarski and L. Kułak 220 (1997) 323

Crystals
Extended Fenske–Hall LCAO MO calculations of core-level shifts in solid P compounds, R. Franke, T. Chassé, J. Reinhold, P. Streubel and R. Szargan 220 (1997) 299

-mixed
The tunneling frequencies of the isotopic forms of methane in rare-gas solids, D. Smith 220 (1997) 279

Glasses
Line broadening in a polymer glass as investigated by stimulated photon echo spectroscopy: spectral diffusion versus heating effects, S.J. Zilker and D. Haarer 220 (1997) 167

Surfaces
Quantum effects in adiabatic electrochemical electron-transfer reactions, M.T.M. Koper, J.-H. Mohr and W. Schmickler 220 (1997) 95
Scattering of large argon clusters from a Pt(111) surface with low collision velocities, M. Svanberg, N. Marković and J.B.C. Pettersson 220 (1997) 137

Biological systems
Phenomenological model for reaction kinetics coupled to a relaxing environment, Y.A. Berlin, A.L. Burin and S.F. Fischer 220 (1997) 25

Microscopic systems

Atoms
Highly correlated QDPT-CI calculations of valence and core photoelectron spectra of Ne, G. Fronzoni and P. Decleva 220 (1997) 15
A three-body calculation for collision-induced dissociation, K. Sakai 220 (1997) 115
Classification of Cm I energy levels using PCA–BPN and PCA–NLM, X. Cao, H. Liu and N. Chen 220 (1997) 289
Ionization and fragmentation of OCS and CS_2 after photoexcitation around the sulfur 2p edge, U. Ankerhold, B. Esser and F. von Busch 220 (1997) 393

Molecules (neutral and ionic)
A three-body calculation for collision-induced dissociation, K. Sakai 220 (1997) 115

-small polyatomics
Diatomics-in-molecules study of the ground and excited states of H_3^-, A.K. Belyaev and A.S. Tiukanov 220 (1997) 43
Non-exponential decays of the S_1 vibronic levels of acetaldehyde, S.-H. Lee and I.-C. Chen 220 (1997) 175

The photoabsorption spectrum of vinylchloride (C_2H_3Cl) in the 8–12 eV range, R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 207
The He(I), threshold photoelectron and constant ion state spectroscopy of vinylchloride (C_2H_3Cl), R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 217
Reaction dynamics of the $Ca(^1D_2, {}^3P_J) + CH_3I \rightarrow CaI^* + CH_3$ system: chemiluminescence, energy disposal and product polarization, J.M. Orea, A. Laplaza, C.A. Rinaldi, G. Tardajos and A. González Ureña 220 (1997) 337
Ionization and fragmentation of OCS and CS_2 after photoexcitation around the sulfur 2p edge, U. Ankerhold, B. Esser and F. von Busch 220 (1997) 393

-other large
Strong-field approach to ultrafast pump–probe spectra: dye molecules in solution, D.H. Schirrmeister and V. May 220 (1997) 1
The magnetic field influence on bridge-assisted electron transfer, E.G. Petrov, I.S. Tolokh, V.V. Gorbach and V. May 220 (1997) 249

-polymeric and biological
Phenomenological model for reaction kinetics coupled to a relaxing environment, Y.A. Berlin, A.L. Burin and S.F. Fischer 220 (1997) 25
Spectroscopic properties of chlorophylls and their derivatives. Influence of molecular structure on the electronic state, Y. Nonomura, S. Igarashi, N. Yoshioka and H. Inoue 220 (1997) 155

Molecular aggregates
Effects of CCl_4 on positronium formation in pure isooctane and in AOT/water/isooctane microemulsions, M.F. Ferreira Marques, H.D. Burrows, M. da Graça Miguel, A.P. de Lima, C. Lopes Gil and G. Duplâtre 220 (1997) 233
Nonradiative processes and infrared emission in matrix isolated ND, N. Caspary, B.E. Wurfel, A.M. Smith and V.E. Bondybey 220 (1997) 241
Degree of aggregation of indocyanine green in aqueous solutions determined by Mie scattering, R. Weigand, F. Rotermund and A. Penzkofer 220 (1997) 373
J-aggregation and disaggregation of indocyanine green in water, F. Rotermund, R. Weigand and A. Penzkofer 220 (1997) 385

-dimers
Quantum chemical exploration of the HCl dimer interaction, A.W. Meredith, L. Ming and S. Nordholm 220 (1997) 63
Forward and reverse excitation energy transport in concentrated two-component systems, P. Bojarski and L. Kułak 220 (1997) 323

-clusters
Scattering of large argon clusters from a Pt(111) surface with low collision velocities, M. Svanberg, N. Marković and J.B.C. Pettersson 220 (1997) 137
Nonradiative processes and infrared emission in matrix isolated ND, N. Caspary, B.E. Wurfel, A.M. Smith and V.E. Bondybey 220 (1997) 241

-complexes
Collision-induced electronic transitions in complexes between benzene and molecular oxygen, B.F. Minaev, K.V. Mikkelsen and H. Ågren 220 (1997) 79

Free radicals (including hydronium and muonium)
A contribution to the theory of OD EPR of spin-correlated radical pairs, K.M. Salikhov, Y. Sakaguchi and H. Hayashi 220 (1997) 355

Ions and charge carriers
Diatomics-in-molecules study of the ground and excited states of H_3^-, A.K. Belyaev and A.S. Tiukanov 220 (1997) 43

Phenomena

Molecular structure
Diatomics-in-molecules study of the ground and excited states of H_3^-, A.K. Belyaev and A.S. Tiukanov 220 (1997) 43
Spectroscopic properties of chlorophylls and their derivatives. Influence of molecular structure on the electronic state, Y. Nonomura, S. Igarashi, N. Yoshioka and H. Inoue 220 (1997) 155
Degree of aggregation of indocyanine green in aqueous solutions determined by Mie scattering, R. Weigand, F. Rotermund and A. Penzkofer 220 (1997) 373

Vibrations and rotations of molecules
Strong-field approach to ultrafast pump–probe spectra: dye molecules in solution, D.H. Schirrmeister and V. May 220 (1997) 1
Spectroscopic investigation of ground state pyrrole ($^{12}C_4H_5N$): the N–H stretch, A. Mellouki, R. Georges, M. Herman, D.L. Snavely and S. Leytner 220 (1997) 311

Electronic structure and states
VUV optical-absorption and electron-energy-loss spectroscopy of formamide, J.M. Gingell, N.J. Mason, H. Zhao, I.C. Walker and M.R.F. Siggel 220 (1997) 191
Classification of Cm I energy levels using PCA–BPN and PCA–NLM, X. Cao, H. Liu and N. Chen 220 (1997) 289
Extended Fenske–Hall LCAO MO calculations of core-level shifts in solid P compounds, R. Franke, T. Chassé, J. Reinhold, P. Streubel and R. Szargan 220 (1997) 299

Electric and magnetic properties
The magnetic field influence on bridge-assisted electron transfer, E.G. Petrov, I.S. Tolokh, V.V. Gorbach and V. May 220 (1997) 249

Molecular interactions
Statistical mechanical treatment of reactive solvent extraction, M. Lukhezo, L.J. Dunne, B.G. Reuben and M.S. Verrall 220 (1997) 53
Collision-induced electronic transitions in complexes between benzene and molecular oxygen, B.F. Minaev, K.V. Mikkelsen and H. Ågren 220 (1997) 79
J-aggregation and disaggregation of indocyanine green in water, F. Rotermund, R. Weigand and A. Penzkofer 220 (1997) 385

Spectral bandshapes and intensities
Collision-induced electronic transitions in complexes between benzene and molecular oxygen, B.F. Minaev, K.V. Mikkelsen and H. Ågren 220 (1997) 79

Energy transfer processes
Strong-field approach to ultrafast pump–probe spectra: dye molecules in solution, D.H. Schirrmeister and V. May 220 (1997) 1
Scattering of large argon clusters from a Pt(111) surface with low collision velocities, M. Svanberg, N. Marković and J.B.C. Pettersson 220 (1997) 137
Forward and reverse excitation energy transport in concentrated two-component systems, P. Bojarski and L. Kułak 220 (1997) 323

Intramolecular dynamics
Ionization and fragmentation of OCS and CS_2 after photoexcitation around the sulfur 2p edge, U. Ankerhold, B. Esser and F. von Busch 220 (1997) 393

-radiationless transitions
A contribution to the theory of OD EPR of spin-correlated radical pairs, K.M. Salikhov, Y. Sakaguchi and H. Hayashi 220 (1997) 355
Ionization and fragmentation of OCS and CS_2 after photoexcitation around the sulfur 2p edge, U. Ankerhold, B. Esser and F. von Busch 220 (1997) 393

-vibrational energy redistribution (including vibrational dissociation)
Strong-field approach to ultrafast pump–probe spectra: dye molecules in solution, D.H. Schirrmeister and V. May 220 (1997) 1

Luminescence spectra, yields and lifetimes
Non-exponential decays of the S_1 vibronic levels of acetaldehyde, S.-H. Lee and I.-C. Chen 220 (1997) 175

Coherence loss processes
A contribution to the theory of OD EPR of spin-correlated radical pairs, K.M. Salikhov, Y. Sakaguchi and H. Hayashi 220 (1997) 355

Non-linear responses (including optical)
Line broadening in a polymer glass as investigated by stimulated photon echo spectroscopy: spectral diffusion versus heating effects, S.J. Zilker and D. Haarer 220 (1997) 167

Reactions (including dissociation)
A three-body calculation for collision-induced dissociation, K. Sakai 220 (1997) 115
Reaction dynamics of the $Ca(^1D_2, {}^3P_J) + CH_3I \rightarrow CaI^* + CH_3$ system: chemiluminescence, energy disposal and product polarization, J.M. Orea, A. Laplaza, C.A. Rinaldi, G. Tardajos and A. González Ureña 220 (1997) 337
A contribution to the theory of OD EPR of spin-correlated radical pairs, K.M. Salikhov, Y. Sakaguchi and H. Hayashi 220 (1997) 355

-gas phase
Diatomics-in-molecules study of the ground and excited states of H_3^-, A.K. Belyaev and A.S. Tiukanov 220 (1997) 43
Nonradiative processes and infrared emission in matrix isolated ND, N. Caspary, B.E. Wurfel, A.M. Smith and V.E. Bondybey 220 (1997) 241

-condensed phase
Phenomenological model for reaction kinetics coupled to a relaxing environment, Y.A. Berlin, A.L. Burin and S.F. Fischer 220 (1997) 25
Quantum effects in adiabatic electrochemical electron-transfer reactions, M.T.M. Koper, J.-H. Mohr and W. Schmickler 220 (1997) 95
Two-level system with noise: Blue's function approach, E. Gudowska-Nowak, G. Papp and J. Brickmann 220 (1997) 125

Tunnelling
Quantum effects in adiabatic electrochemical electron-transfer reactions, M.T.M. Koper, J.-H. Mohr and W. Schmickler 220 (1997) 95
Line broadening in a polymer glass as investigated by stimulated photon echo spectroscopy: spectral diffusion versus heating effects, S.J. Zilker and D. Haarer 220 (1997) 167
The tunneling frequencies of the isotopic forms of methane in rare-gas solids, D. Smith 220 (1997) 279

Electron transfer
Quantum effects in adiabatic electrochemical electron-transfer reactions, M.T.M. Koper, J.-H. Mohr and W. Schmickler 220 (1997) 95
The magnetic field influence on bridge-assisted electron transfer, E.G. Petrov, I.S. Tolokh, V.V. Gorbach and V. May 220 (1997) 249

Positron annihilation
Effects of CCl_4 on positronium formation in pure isooctane and in AOT/water/isooctane microemulsions, M.F. Ferreira Marques, H.D. Burrows, M. da Graça Miguel, A.P. de Lima, C. Lopes Gil and G. Duplâtre 220 (1997) 233

Ionization (including Rydberg states)
Highly correlated QDPT-CI calculations of valence and core photoelectron spectra of Ne, G. Fronzoni and P. Decleva 220 (1997) 15
The photoabsorption spectrum of vinylchloride (C_2H_3Cl) in the 8–12 eV range, R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 207
The He(I), threshold photoelectron and constant ion state spectroscopy of vinylchloride (C_2H_3Cl), R. Locht, B. Leyh, K. Hottmann and H. Baumgärtel 220 (1997) 217

Molecular motion (including diffusive)
Phenomenological model for reaction kinetics coupled to a relaxing environment, Y.A. Berlin, A.L. Burin and S.F. Fischer 220 (1997) 25
The tunneling frequencies of the isotopic forms of methane in rare-gas solids, D. Smith 220 (1997) 279

Structure of solids and liquids
Effects of CCl_4 on positronium formation in pure isooctane and in AOT/water/isooctane microemulsions, M.F. Ferreira Marques, H.D. Burrows, M. da Graça Miguel, A.P. de Lima, C. Lopes Gil and G. Duplâtre 220 (1997) 233
Structure and dynamics at the surface of a concentrated aqueous solution of CsF, J. Dietter and H. Morgner 220 (1997) 261
